EDUCATION

New Jersey Institute of Technology

Ph.D. in Computer Science (ongoing)

Advisors: Dr. Alisha Pradhan, Dr. Dimitri Theodoratos

Passed Ph.D. Qualifying Exam (May 2026)

Aug 2024 - Present

Expected Graduation: 05/29

Shahjalal University of Science & Technology

B.Sc. in Computer Science and Engineering

CGPA: 3.56/4.00 (3.85 in the last two years).

May 2023

RESEARCH INTERESTS

Human-Computer Interaction, Human-AI Collaboration, Trust in Technology, Aging and Accessibility.

PUBLICATIONS

Peer-reviewed Publications

- **Muhid Hassan Risvy**, Dimitri Theodoratos, Alisha Pradhan. (2026). Towards Designing for (Dis)Trust in Technologies for Aging. In *Proceedings of the 28th International ACM SIGACCESS Conference on Computers and Accessibility (ACM ASSETS 2026)*. (Accepted). Preprint: [arXiv:2608.02784](#).

Under Review

- Older adults' envisioned post-mortem representation and implications for digital legacy design (title anonymized). (ACM CHI 2027).
- People with MCI and dementia designing intelligent assistance for future changes in ability (title anonymized). (ACM CHI 2027)

RESEARCH EXPERIENCE

- Ran 1:1 technology ideation sessions with 10 older adults, using scenario and design cards to explore how they envision being represented after death. Co-coded and memoed about 20 hours of session data using reflexive thematic analysis, and co-wrote the manuscript (ACM CHI 2027, under review).
- Co-author on a co-design study with people with MCI or dementia on how they want intelligent systems to assist them as their abilities change (ACM CHI 2027, under review).
- Led a qualitative literature review of empirical studies on older adults' trust and distrust in technology using reflexive thematic analysis, identifying three themes (material legibility of information, temporal fluidity of trust, and distrust as boundary setting) and resulting design directions (first author, ACM ASSETS 2026).

TEACHING EXPERIENCE

Graduate Teaching Assistant

New Jersey Institute of Technology

Fall 2024 - Present

Fall 2026	DS 110 – Basic Foundations of Artificial Intelligence
	CS 332 – Principles of Operating Systems
Spring 2026	CS 698 – Human-Robot Interaction
	CS 288 – Intensive Programming in Linux
Fall 2025	CS 288 – Intensive Programming in Linux (two sections)
Summer 2025	CS 288 – Intensive Programming in Linux
	CS 332 – Principles of Operating Systems
Spring 2025	CS 388 – Android Application Development
Fall 2024	CS 351 – Introduction to Cybersecurity

SKILLS AND COURSEWORK

Research Methods	Semi-structured interviews, co-design and ideation sessions, reflexive thematic analysis, qualitative coding and memoing, user-studies.
Courses	CS 698: Human Factors in Security and Privacy, CS 785: Explainable AI, DS 675: Machine Learning, CS 670: Artificial Intelligence.
Programming	C, C++, Java, Python, JavaScript, MATLAB; solved 850+ problems on CodeForces , LeetCode , Vjudge , etc.

SERVICE AND ACTIVITIES

Vice President , Bangladeshi Graduate Student Association at NJIT	Apr 2026 - Present
Treasurer , Bangladeshi Graduate Student Association at NJIT	May 2025 - Apr 2026
Soccer : Champion, Intra IICT Tournament, SUST	2019
Table Tennis : Runners-Up, Intra-Department Tournament, SUST	2022

PREVIOUS RESEARCH PROJECTS

Security Analysis of Software-Based Cryptocurrency Wallets (Undergraduate Thesis)
Analyzed user reviews of cryptocurrency wallets, manually and with fine-tuned machine learning techniques to understand how users perceive their security, usability, and privacy; complemented the analysis with vulnerability assessment tools.
COVID-19 Vaccine Supply Chain GitHub
Built a private blockchain supply chain for end-to-end traceability of COVID-19 vaccines (Hyperledger Fabric, Node.js, JavaScript, Apache CouchDB).

ACCOMPLISHMENTS

Finalist, Bangladesh Blockchain Olympiad	2021, 2022
Featured on BBC News Bangla for the COVID-19 blockchain project (see website)	June 2022
